EDUCATION

B.E. Computer Science Engineering - Sri Venkateswara College of Engineering (Expected 2027).
AICTE PMSSS Scholarship Holder - Government of India merit based scholarship awarded for strong academic performance.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C, C++, SQL
Full Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), REST API Development
Backend Technologies: Node.js, Express.js, Spring Boot, Microservices Architecture
Databases: PostgreSQL, MongoDB, MySQL including schema design, query optimization and indexing
Real Time Systems: WebSockets, Socket.IO
Core Concepts: Data Structures and Algorithms, Object Oriented Programming, System Design, Authentication and Authorization

PROFESSIONAL EXPERIENCE

MERN Stack Development Intern - Uptoskills (Current)

- Developing full stack web applications using the MERN stack including MongoDB, Express.js, React.js and Node.js.
- Implementing RESTful APIs and backend services enabling structured communication between frontend applications and server systems.
- Designing modular backend architectures and reusable frontend components for scalable application development.
- Working with Git based collaborative workflows including repository management, branching strategies and code reviews.

Software Development Intern - SoftNexis

- Developed modular backend services and REST APIs using JavaScript based server technologies.
- Implemented API endpoints enabling communication between frontend applications and backend services.
- Diagnosed backend performance issues using debugging and logging improving application reliability.
- Worked within Git based workflows maintaining structured repositories and version control.

Software Engineering Virtual Experience - JPMorgan Chase and Co.

- Built an event driven microservice using Spring Boot integrated with Apache Kafka for transaction processing.
- Implemented Kafka consumers responsible for validating and processing high volume streaming financial transactions.
- Designed relational persistence using Spring Data JPA with entity modeling and transaction management.
- Implemented service level testing and validation workflows ensuring reliability of event driven transaction pipelines.

PROJECTS

TaskFlow Productivity and Workflow Platform

- Designed and developed a full stack productivity platform enabling users to manage tasks, organize workflows and track project activities.
- Implemented frontend architecture using React with reusable UI components and responsive interface design.
- Built backend services using Node.js and Express integrated with PostgreSQL database schema and REST API endpoints.
- Integrated real time collaboration using Socket.IO allowing synchronized task updates across connected users.

Apogee Real Time Productivity Platform

- Developed a real time productivity dashboard delivering live analytics and dynamic updates for monitoring productivity metrics.
- Built frontend using React and Vite enabling efficient component rendering and optimized development builds.
- Implemented WebSocket communication enabling synchronization of application state across multiple active users.
- Designed scalable interface architecture capable of handling large datasets and frequent real time updates.

BrainBox Smart Revision Assistant

- Developed an intelligent learning platform generating flashcards and structured revision schedules for efficient studying.
- Implemented responsive user interfaces using React and TypeScript supporting structured study workflows.
- Implemented spaced repetition algorithms improving learning retention through adaptive revision intervals.
- Optimized retrieval and rendering performance ensuring efficient access to educational resources.

CLOUD SKILLS AND GOOGLE CLOUD LAB EXPERIENCE

- Google Cloud Skills Arcade participant completing hands on labs and technical exercises on Google Cloud Platform.
- Completed labs including Dataproc Qwik Start, BigQuery data exploration, Looker Data Explorer and Google Cloud fundamentals.
- Gained experience executing cloud console workflows, distributed data processing jobs and cloud based analytics pipelines.

ACHIEVEMENTS

- Cadet Warrant Officer - NCC Air Wing (1 TN AIR SQN) responsible for leadership of more than 80 cadets.
- NCC C Certificate Holder demonstrating discipline, leadership and advanced NCC training.
- Selected for IASC VSC National Camp, representing my unit and competing with NCC Air Wing units across Tamil Nadu.
